

SOURAV YADAV

Software Development Engineer | Full-Stack Developer

Madhya Pradesh, India | sourav.dev.officials@gmail.com | Portfolio: sourav-iiitbpl.vercel.app

GitHub: github.com/Sourav-IIITBPL | LinkedIn: linkedin.com/in/0xsourav

LeetCode: leetcode.com/u/SouravIIIT | CodeChef: codechef.com/users/sourav_yadav25

EDUCATION

Indian Institute of Information Technology, Bhopal

Expected 2027

B.Tech — Electronics & Communication Engineering | CGPA: 7.57/10

TECHNICAL SKILLS

Languages: C++, JavaScript, TypeScript, Rust, Solidity, SQL

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Backend: Node.js, Express.js, PostgreSQL, MySQL, Redis, Prisma

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Tools: Git, GitHub, Linux, Docker, Foundry, Vite

Web3: Ethereum, Viem, Wagmi, Chainlink, Smart Contracts

PROJECTS

PreFlight — Pre-Transaction Risk Analysis Platform *Solidity · Foundry · Chainlink CRE · React · TypeScript · Viem*

Link: preflight-v1.vercel.app

- Built a transaction-security platform that simulates and analyzes DeFi transactions before execution to identify security and execution risks.
- Designed modular on-chain guards and off-chain simulation workflows for transaction validation and risk assessment.

SettleOne — Payment Commitment Platform *React · Node.js · Express.js · PostgreSQL · Solidity · Foundry · Viem*

Link: settleone-marketing.settleone.workers.dev

- Built a full-stack payment commitment platform supporting buyer-seller escrow workflows and transaction lifecycle management.
- Developed backend APIs for deal creation, transaction verification, dispute handling, and settlement.

Protocol Invariant Checker — Rust CLI

Rust · CLI · Protocol Analysis · Testing

Link: github.com/Sourav-IIITBPL/protocol-invariant-checker

- Developed a modular Rust CLI for automated protocol invariant checking and structured security reports.
- Used trait-based abstractions to support reusable protocol implementations and extensible analysis pipelines.

EXPERIENCE

Independent Software Security Researcher — Sherlock · Code4rena · Cantina July 2025 – June 2026, Remote

- Audited 20+ smart-contract codebases, analyzing business logic, state transitions, edge cases, and security invariants.
- Developed reproducible proof-of-concepts and testing environments to validate identified issues.
- Strengthened skills in codebase comprehension, debugging, testing, and software architecture analysis.

Blockchain Engineering Intern — SKXYWTF

Aug 2026 – Sep 2026, Part-time, Remote, Phoenix, AZ, USA

- Developed an automatic LLM API-based smart contract auditing suite running static analysis tools and producing audit reports, with LLM API calls used to perform AI-agent-assisted auditing.

ACHIEVEMENTS

- LeetCode Knight — 1868 max Rating; 500 DSA problems solved through consistent practice.
- CodeChef 2-Star Coder — 1493 max Rating, built through consistent participation in rated contests.
- Smart India Hackathon 2024 — National-level Participant & Team Lead.
- HackVision 2026 — Top 100 finalist among 400+ teams.
- AlgoUniversity Tech Fellowship — 2024 Stage 1 qualifier; secured Top 4000 among 20,000 participants.
- HER DAO Rust Cohort 1 Graduate.
- Cyfrin Updraft Certified — Smart Contract Development & Security.
